

Would You Like Me To Hand You A 7 Step Blueprint For Living BIG ... For Free?

From the desk of Carl Harvey

September 18th 2014

Dear Big Life Subscriber,

If you want to live a BIGGER life – *filled with more abundance, success and an ever-increasing sense of wellbeing* – this could be the most important letter you'll ever read.

Here's why:

Over the past 4 months I've been lucky enough to host "no holds barred" interviews with some of the finest personal growth teachers on the planet – including legends like Bob Proctor, Dr Joe Vitale, Christie Marie Sheldon, Lisa Nichols, Laura Silva and Bob Doyle.

As a result, I've made an amazing discovery that can **consistently help you to create better results...** to your health, wealth, mindset and wellbeing.

Here's How It Works

When you spend hours interviewing the happiest, most abundant & successful personal growth experts in the world, you're going to learn a LOT.

(Like how most of these teachers share a very similar set of beliefs.)

But the beliefs aren't the big discovery.

The big discovery is that we **ultimately cracked the code on how anyone can go from where they are... to quickly living bigger... in ALL areas of life.**

Let me explain...

23 Hours Of Private Interviews Reveal The Fastest Path To Explosive Abundance

In the past few months, I've hosted more than 23 hours of interviews with 15 different experts – and I've discovered they all live (to greater or lesser extent) *aligned with 7 key principles.*

What this means is – no matter what your dream is, there's pretty much a “universal” 7 step formula that can **dependably help you create more success, happiness, abundance, passion & purpose in your life.**

In fact, after spending hours reviewing these interviews, I've been able to...

Uncover A Simple 7 Step Process That Makes It Easier To Live BIG

Now here's what's really awesome.

Even though this 7 step blueprint is pretty simple...

And even though it's been proven by amazing folks like **John Assaraf, Dr Joe Vitale, Bob Proctor, Laura Silva, Christie Marie Sheldon and Lisa Nichols...** as well as literally 100's of Big Life subscribers who have quickly created extraordinary improvements in their lives...

The fact remains that you and I have an incredible advantage because –

Hardly Anyone Knows About This 7 Step Formula!

And the reason why is simple:

I've never publicly written about it.

... Until Today.

But Now I'm Going To Hand You This Amazing 7 Step Formula... Free :-)

I'll tell you why I'm doing this in a minute – except for the obvious, which is me wanting to **share the love** – but first, let's get right to it.

Because when you start to apply these 7 principles, you'll begin to experience:

- **More Abundance Flowing Towards You**
- Greater Self Confidence and Belief
- **A Deeper Passion and Zest For Life**
- “Ah Ha!” Moments and Creative Breakthroughs
- **Ever-Increasing Levels of Wellbeing and Happiness**
- A Tangible Sense of Progress, FLOW and Momentum
- **Amazing Synchronicities and Coincidences**
- Better Results... With ZERO Struggle or Stress
- *And much, much more...*

Yep... it's pretty damn cool :-)

In fact, this 7-Step system is the #1 shortcut I've found for living big.

So... let's get to it!

Step 1: You Need A Vision

Every single expert I've interviewed has stressed the importance of having a **clear, vivid and exciting vision**.

This doesn't need to be complicated or particularly long-term – your vision is simply a roadmap for *what you want your life to become next*.

(But keep in mind – if you don't have a big vision, you'll never experience big results. Makes sense, right?)

Some key things to remember:

1. **You have to know what you WANT.** (It's not enough to know what you *don't want*, because your subconscious mind can't process negatives... so when you say “I don't want to be broke”, you're actually programming your subconscious to stay broke! Oops...)

2. **You gotta write your vision down.** There's something magical about writing your dreams, goals and vision on paper. It really works! Plus, it helps you to stay focussed on your vision. So... no excuses :-)
3. **Be specific.** It isn't enough to say "I want to be rich". *It's too vague.* Instead, create a crystal-clear vision your subconscious can chew on, like "I am so happy and grateful that I now earn \$10,000 every single month, doing coaching work I absolutely love, working with clients who love and respect me, working only 4 hours a day..."

And above all...

Make your vision exciting!

Like... overwhelmingly awesome and amazingly, jaw-droppingly cool :-)

Why? Because if your vision doesn't excite you *now*, you're simply not going to put in the time, energy and work needed to manifest it.

Cool?

Onwards to step 2...

Step 2: Engage The Power of Your Subconscious Mind

Here's the #1 problem you face:

Most of us set only goals at the *conscious* level... which leaves us relying almost exclusively on motivation and willpower to manifest our dreams.

But – as you've no doubt experienced, **motivation and willpower are finite resources!**

(Which means that when they – inevitably – run low, you stop taking action towards your goals... and often fail to reach them.)

The good news is... there's a simpler way to create a big life!

And that's simply to **discover how to utilize the vast, overwhelmingly awesome power of your subconscious mind.**

Here's why...

Dr Bruce Lipton from Stanford University says that your subconscious mind “ultimately casts the deciding vote” on how much money you’ll make; how happy you’ll be; how well you perform at work, the kinds of people you attract into your life, how positive you are... etc etc.

That’s not to mention...

Your Subconscious Mind Is One Million Times More Powerful Than Your Conscious Mind

Yep – Dr Lipton says that your subconscious is “one million times” more powerful than your conscious mind. And the latest neuroscience suggests that 95-99% of our resources are accessed via the subconscious.

Which means that if you *don’t* engage your subconscious mind for creating your big life, **you’re relying on just 1-5% of your total resources!**

Imagine that!

To me, it’s no surprise that T. Harv Eker writes in *Secrets of The Millionaire Mind*:

“It all comes down to this: if your subconscious blueprint isn’t set for success, nothing you learn, nothing you know, and nothing you do will make much of a difference.”

But here’s where things get really exciting:

Because when you learn how to work *with* your subconscious mind – to set goals at the subconscious level; to let go of limiting beliefs; and to “reprogram” your subconscious for greater levels of success – **manifesting your desires becomes automatic, effortless... and fun!**

Here’s how to do it:

Step 3: Practice Creative Visualization To Quickly Reprogram Your Subconscious Mind

Creative Visualization is the practice of imagining your dream life in vivid, “high definition” detail.

You simply *see* what you'll see... *hear* what you'll hear... and *feel* what you'll feel when your goals have all manifested – all inside your imagination.

Why do this?

Because it's the fastest, most enjoyable and most effective way to reprogram your subconscious mind!

In fact, Bob Proctor, John Assaraf, Lisa Nichols, Dr Joe Vitale, Christie Marie Sheldon – and many more experts I've interviewed – RAVE about the power of visualization.

Here's why it works so well:

Dr Maxwell Maltz revealed in the classic book *Psycho Cybernetics*, that your subconscious mind **“cannot tell the difference between what's real... and what's imagined.”**

In other words, when you visualize your BIG life – and see yourself as happy, abundant, doing work you love, surrounded by the people you want, living with passion and on purpose...

... Your subconscious mind thinks this is happening for real!

Using Visualization To Manifest Magic - Fast!

When you keep visualizing your dream long enough – usually just a few weeks – your subconscious mind will ACCEPT WHATEVER YOU ARE VISUALIZING AS A TARGET FOR IT TO MANIFEST.

This means the 95-99% of your subconscious resources will do whatever it takes to manifest your dream... as quickly as possible!

Napoleon Hill explains in *Think and Grow Rich* why this happens:

“Our brains become magnetized with the dominating thoughts which we hold in our minds, and, by means with which no man is familiar, ***these magnets attract to us the forces, the people, the circumstances of life which harmonize with the nature of our dominating thoughts...***”

Yep... in other words, this is when the magic starts to happen!

=> You'll start to experience creative insights and ideas.

=> You'll be in the right place at the right time.

=> You'll find yourself knowing exactly what you need to do next.

=> You'll feel great, full of confidence and optimism and passion for the manifestation of your big life.

=> You'll attract the "forces, people and circumstances" you need.

And – best of all – all you need to do next is...

Step 4: Take "Inspired Action"

This is super-easy.

The problem is, **most people over-think things...** so they try and create big plans and figure out everything they need to do, *now*, in order to manifest their dreams.

This is not necessary... In fact, it's downright counter-productive!

Simply because – when you work with your subconscious mind – the next step for you to take is always revealed.

I'll repeat that:

THE NEXT STEP IS ALWAYS REVEALED!

Practice the previous 3 parts of this system, and you will get hunches, ideas, insights and "Ah Ha!" moments about what you need to do next.

Your only job is to take action on these hunches.

This is the art of "Inspired Action."

Remember: you don't need to figure it all out.

You don't need a master-plan.

Simply have a vision, visualize it.... focus on it often... *and the ideas and next steps will take care of themselves.*

In fact, they'll be obvious!

All you need to do is remember to chill out and enjoy the process.... and implement the ideas that pop into your mind.

(This doesn't require struggle, stress or "hard work" of any sort.)

Which leads us nicely to...

Step 5: Meditate For A Few Minutes Every Day

Meditation is badass, proven by 1000's of studies and will help you live big.

Why? Because it helps you tap into your higher powers.

Plus, meditation helps you experience more happiness, creativity and wellbeing.

And your productivity and focus will shoot sky-high.

In fact, just a few minutes a day will make a *huge* difference to your life.

Give it a try... and experience all the benefits yourself.

But before then, it's important you understand...

Step 6: Live By The Principle That "You Can't Out-Give The Universe"

This is where things get a little tough.

Because it's all about making the switch from *getting...* **to giving.**

Here's the best way I can explain it:

If you want to create MORE in your life – more money, more abundance, more toys, more travel, more experiences, more success – *please stop chasing money and goals.*

Stop chasing success!

Instead, realize a fundamental truth which Dr Joe Vitale shared with me:

“You Can’t Out-Give The Universe!”

Here’s why:

Abundance – in all its forms – flows to you when you PROVIDE VALUE to other people.

That’s why...

When You Focus On Helping People And Being Of Service First, Money-Making Opportunities Literally Present Themselves To You!

You probably already know that **nature abhors a vacuum**.

So when you GIVE something – your expertise, your time, your money, your energy, your passion, your love, etc – *it creates a vacuum...* which is frequently then filled with the good you desire.

Please... try this out!

Stop chasing what you want.

Give a little more instead.

You’ll be astonished at the results you experience.

Now... let’s tie this all together...

Step 7: Get A Daily Routine

This is perhaps the #1 most important part of creating a big life.

It’s all about carving out some time every day for your personal growth – to focus on your vision, visualize, meditate, express gratitude... or do whatever else you like to do to put you in a peak state of FLOW.

Everyone from Bob Proctor to Christie Marie Sheldon to Lisa Nichols to John Assaraf talks about the power of taking time for personal growth every day.

In fact, every single successful person I’ve interviewed said this is ESSENTIAL!

It's so simple... yet so powerful.

So I invite you now:

Commit to your personal growth for 15-60 minutes a day.

It'll change your life... you'll be more focussed, happier, more confident, more optimistic... and the challenges of life will simply melt away, leaving you free to create all the epic results and experiences you desire.

And if you need a little help with that...

I'd Love To Invite You To Be One Of The Founding Members Of My *Inner Circle*
